

10 STEPS TO FOLLOW FOR FORKLIFT SAFETY

 1 Inspect the forklift before operating

 2 Always fasten your seatbelt

 3 Maintain appropriate driving speed

 4 Drive slower on wet/slippery floors

 5 Drive with forks close to the ground

 6 Stay aware of your surroundings

 7 Slow down & sound horn at all blind spots

 8 Keep the load stationary while moving

 9 Check for overhead clearance

 10 Drive with the weight uphill

SAFETY IS NO ACCIDENT

According to OSHA, an estimated 96,785 non-serious, serious, and fatal forklift injuries occur every year. SUNZ Insurance is dedicated to providing workplace safety awareness and to help guide your company in the right direction when establishing effective safety protocols. Take a look through our [Risk Management Center](#) for sample PIT Programs and other forklift safety awareness information that could benefit your company and keep your workers safe.
